DETAILED ACTION

1. This communication is in response to amendment filed 5/11/06.

Response to Amendment

2. The applicant has improperly numbered the claims. On page 3 the applicant lists sequentially the status of claims. Claim 3 is properly listed as (Currently Amended), however it ^{is} identified as "1." (Interpreted as claim 1.) The examiner suggests deleting the number "1." which is indicated in front of claim 3 preamble.

Thus, in the present amendment claim 3. remains pending and claims 1-2 and 4. have been cancelled.

The present amendment has been treated as responsive to the non-final action mailed 7/28/06.

Claim Rejection - 35 U.S.C. 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 3 is rejected under 35 USC 101 because the claimed invention is directed to non-statutory subject matter.

Claim 3 recites in the preamble, a system which employs both computerized and expert editorial standardization, of risk management . However, the body of the claim recites a plurality of independent and distinct inventions (or at least statements of the inventions). Element a) recites a system (treated as apparatus) of risk management, b) recites a system (treated as apparatus) of risk management which is distinct from a), and c) a system expressing computer-based technology alternatives which system is distinct from and independent of functionalities of a) and b).

Therefore, it is asserted that claim 3 recites multiple inventions. 35 USC 101 requires that the claim be limited to a single invention whether process, machine (i.e. a system), manufacture, or composition of matter. The claim is non-statutory and rejected under 35 USC 101 as being non-statutory claim.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: structural elements of the system stated in the preamble. The claim fails to recite any structural elements of the invention . Instead it recites four distinct

Art Unit: 3693

systems in a narrative form. For example, limitation a) describes a system without pertinent structure (one or more components that make the system). See example below. (The applicant should adopt this type language of claim from the issued patents).

1. A system for supporting consumer transactions billed to an account through a cellular telephone comprising:
 - a merchant data receiver for receiving merchant transaction data from a merchant terminal at a transaction site;
 - a consumer data receiver for receiving consumer transaction data from a cellular telephone of a consumer at the transaction site; and
 - a transaction processor for processing the merchant transaction data and the consumer transaction data to access a financial account so that approval for a transaction at the transaction site may be obtained and for generating a transaction record using the merchant transaction data and the consumer transaction data.

Note that the system is comprised of one or more constituent elements with having corresponding functionality.

The examiner cannot discern the boundaries which define the scope of the claimed system. Therefore, no prior art analysis is performed subject to further clarification of the presented claim.

Pro-se Applicant

7. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure

Art Unit: 3693

the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH

Art Unit: 3693

shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
